

WILDAN SETYA NUGRAHA

FULLSTACK DEVELOPER

 +62 821-2010-0477 |  wildannugraha330@gmail.com |  www.wwdnn.web.id

Fullstack Developer with 3+ years of experience building custom business applications end-to-end. Comfortable across frontend and backend working with JavaScript, Python, PostgreSQL, and component-based UI frameworks. Experienced in REST API design and integration, modular UI architecture, performance refactoring, and translating business requirements into working software. Focused on writing pragmatic, maintainable code that ships.

EDUCATION

Universitas Jenderal Achmad Yani

Bachelor of Informatics Engineering | GPA 3.75/4.00 | 2025 – 2026

Politeknik Negeri Bandung

Diploma in Informatics Engineering | GPA 3.63/4.00 | 2021 – 2024

Awards:

- 1st winner KMIPN – ICT Business Design (2022)
- 2nd winner KMIPN – ICT Business Design (2023)

WORK EXPERIENCES

PT Neural Technologies Indonesia

Middle Fullstack Developer

2025 - Present

- Delivered end-to-end features across frontend, backend, and database layers, working closely with domain experts and business analysts.
- Designed backend services and data models in Python + PostgreSQL to support new business flows and reporting requirements.
- Built custom interactive UI components and dynamic web views combining JavaScript, templating engines, and reactive UI logic.
- Designed and consumed REST APIs for integration between systems and third-party services.
- Delivered a domain-specific engineering design application as sole developer, covering UI, backend, and calculation logic in a 3 month timeline.
- Developed template-based reporting interfaces (QWeb, Excel, ODT) with improved data accuracy and rendering logic
- Contributed to internal patterns for reusable widgets and data driven UI, improving development speed across modules.

PT Neural Technologies Indonesia

Junior Fullstack Developer

2023 - 2025

- Designed and implemented modular frontend architecture for enterprise dashboards, enabling independent development and scalable UI enhancements.
- Built interactive UI components and dynamic views to improve user workflows and content flexibility.

- Performed major performance refactoring on UI behavior and backend interactions, improving response times by 30–40%.
- Integrated external REST APIs for real-time data synchronization between systems.
- Extended core business modules with custom workflows and Python business logic.
- Translated business requirements into clear interface flows in close collaboration with UI/UX and BA teams.

SKILLS

Frontend Development:

- JavaScript (ES6+), TypeScript
- Component-based development: OWL, React.js, Next.js
- HTML5, CSS3, Tailwind CSS, responsive design
- UI modular architecture, custom widgets, dynamic components
- State management, reactive patterns

Backend Development:

- Python (business logic, ORM, service layers)
- REST API design & integration
- PostgreSQL (schema design, queries, indexes)
- SQLite for lightweight applications
- QWeb templating, XLSX / ODT reporting

Tools & Practices

- Git, GitHub, GitLab workflows
- Linux commands, VS Code
- Requirement translation & technical writing
- AI assisted development workflow
- Agile & SDLC practices

LANGUAGES

- Bahasa Indonesia (Native)
- English (Professional Proficiency)
